## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Enyedy et al in view of Scheller. Enyedy et al teach the claimed subject matter except for showing use of a gas controller on the handle to control gas flow to the torch and hence the gas pressure. Scheller is applied for teaching a gas control via barrel b, which effect a local gas control of pressure. In view of this teaching it would have been obvious to modify the Needy system to include the same to effect more efficient control of the gas flow.

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

***Allowable Subject Matter***

Claims 1-3 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach a gas solenoid in a plasma torch handle for controlling gas flow to the plasma chamber of the torch.
